**Subject:** Jenison Septic Question

Good morning

I was given the advice to send an inquiry to the Board regarding city sewer down my street in Jenison.

We live in the district across from the library, between Baldwin and Rosewood. We are the only street in this area without city sewer (Fairview St). This street was built in the mid to late 1960's. We all have septic systems on this street. I have tried a couple of times to inquire about a petition to get city sewer without any luck

One option the Road Commissioner mentioned was the ability for the Board to make city sewer a requirement when the road is repaved. We have lived here for over 28 years and as far as I can remember, only once has the road been resurfaced.

What is the possibility of the road being repaved and sewer made a requirement? These homes are all 50+ years old, each with 1 or more septic/drain fields. We are so very tired of dealing with septic and the problems that come with aging drain fields. I am looking at possible avenues to get city sewer down this street.

I appreciate your thoughts  
Barb
