

I reached out to Fred Keena, Traffic Engineer for Ottawa County Road Commission and was told that the Township made the decision in 2006 to remove a crosswalk at this location for safety reasons. I also spoke to the school and was told to contact the township.

Understanding the county would be the final decision maker, if the township is not opposed or better yet is supportive of this request, I would be happy to take this back up with the road commission. Aside from children walking to school there are a lot of people that run/walk in this area and cross the street at this location without the benefit of a crosswalk. A signaled crosswalk similar to what was installed on Chicago Drive would certainly increase the safety for these people.

Thank you again for your consideration.
