RE: Proposal for Georgetown Charter Township Wastewater Collection System Analysis

Dear Joel:

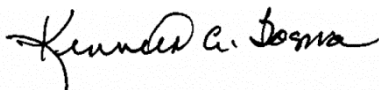

Prein&Newhof is pleased to submit this proposal to Georgetown Charter Township to evaluate their wastewater collection system capacity for the Bauer Pump Station. This evaluation will include the following components:

1. Calculate and review the estimated current flow going into the Bauer Pump Station
2. Calculate the projected flows going into the Bauer Pump Station
3. Review possible impacts to receiving sewers and pump stations.
4. Determine the projected pump station and/or force main improvements that will be needed for the Bauer Pump Station to handle the projected flows. (This will include a site visit to the pump station site to obtain information on the current configuration of the pump station and its components on the site.)
5. Prepare a memo report of findings with estimated project costs.

We estimated our fees for our services to be **\$14,000**. Please contact us if you have any questions. Prein&Newhof appreciates the opportunity to provide you with this proposal.

Sincerely,

**Prein&Newhof**

Kenneth A. Bosma, P.E.
